

SPORTS ACHIEVEMENT OPTIMIZATION WORKSHOP IN SLEMAN DISTRICT

by Dr. Fauzi, M.Si.

ABSTRACT

The PPM procedure must first determine the activity objectives, the implementation process and so on. For PPM activities, first design training activities as well as possible so that the steps to be taken can be carried out properly. After designing the activity, the next step is to communicate with partners for finalization in the activity. In this case, KONI of Sleman Regency will be a partner in this activity. The event will be held on Tuesday, July 2, 2022.

The activity will be carried out in 2 sessions, namely the first session will be filled with material from presenters related to DBON. The next session in addition to continuing the material, there will also be a discussion session related to the material that has been delivered. Instructors provide input related to optimizing sports achievements. After the activity is completed, an evaluation will be carried out by KONI and the Department regarding the implementation. The method that is widely used is focused discussion with resource persons as facilitators and assistance to participants to actively explore, conduct trials, create methods and forms of training that are relatively new to trainers.
