ABSTRACT

Pancasila and Citizenship Education Subjects (PPKn) in Senior High Schools are subjects relating to abstract material. To facilitate understanding of the values ??of Pancasila, it is necessary to develop PPKn learning media to facilitate students in understanding very abstract material. This study aims to develop learning media that can be used by teachers in teaching PPKn in Senior High Schools (SMA). This research uses research and development methods (Research and Development) with the following steps. (1) conducting preliminary research to study the needs of learning media that can be used in PPKn learning, (2) supporting learning media that can be used in PPKn learning, specific material about Pancasila, (3) developing learning media that can be used for PPKn learning in high school . The subjects in this study were students and PPKn teachers in high school. Data collection uses questionnaires, interviews, and observations. Data analysis techniques using qualitative and quantitative analysis. Based on the results of the study 1) LEGASI learning media application is done by analysis. Design, Development, Implementation and Evaluation. 2) the results of the feasibility of the material experts are categorized as very feasible to use (89.04%), media experts are categorized as very feasible to use (90.78%). Small group trial results The range of scores from 4.0-4.6 including this media is already feasible to be tested in large groups. And trials in large groups obtained a range of scores from 3.96-4.68 already shows this media is good and very feasible to use for learning PPKn material for state institutions in Indonesia for high school students in class X.
