### **Abstract**

This research was aimed at (1) identifying various of marriage-related properties among migrant of Minangkabau families at Yogyakarta; (2) describing conflict resolution of heritage-related problem among migrant of Minangkabau society at Yogyakarta. It was its uniqueness and its tradition to out-migration causing altering custom law that had triggered this research.

As a descriptive research, this research data was collected through interview and studying document. Starting with choosing key informants, six persons were selected as informants. Validity of data was examined through establishing rapport, peer debriefing, and member check. Conclusion was drawn inductively.

The results were as follows. (1) there are two kinds of properties: achieved properties and permanent belongingness of wife ones. The first one is a shared property, while the last one belongs to wife. (2) the migrant of Minangkabau rejected their old custom law and adopted Islamic Law partially. The resolution of conflict related to heritage belongings are conducted through three alternative ways: a) giving gift or gift will to their children; and b) establishing their heirs including their son and daughter and their spouses; c) giving gift to their nephew or cousin part of the heritage properties.
