## **ABSTRACT**

The purpose of the PPM activity is to provide appropriate technology skills (TTG) to manufacture instant herbal products and ginger-based antibacterial soaps that are easy to apply in the community in Mulyodadi Village, Bambang Lipuro, Bantul, and increase interest in entrepreneurship for the people in these areas. The method used in PPM activities is to provide training and assistance in the manufacture of herbal instant products and temulawak-based antibacterial soaps. PKM activities that have been carried out in Mulyodadi Village, Bambang Lipuro, Bantul, have succeeded in increasing the knowledge and insight of the residents. Another benefit obtained is the emergence of ideas for entrepreneurship to take advantage of free time between busyness as a housewife.

*Kata Kunci: herbal soap; instan herbal product; temulawak*
