

# ASSESSMENT OF LEARNING TECHNIQUE TRAINING FOR IPS TEACHERS IN BANJARNEGARA

by Nasiwan, Taat Wulandari, Agustina Tri Wijayanti

## ABSTRACT

*Assessment is an important part of the learning process. Educators as managers of learning activities in carrying out assessments can find out the abilities possessed by students, the accuracy of the teaching methods used, and the success of students in achieving the competencies that have been set. Based on the results of the assessment, educators can make appropriate decisions to determine what steps to take next. The results of the assessment can also motivate students to perform better. Various types of valuation techniques can be done complementary (complementary) in accordance with the competencies assessed.*

*The implementation of the training in the framework of preparing learning outcome assessment instruments was carried out with several activities. The first activity about giving information is related to learning outcomes assessment techniques which include the ability of knowledge, attitudes and skills. The second day of training activities related to the preparation of instruments for the assessment of knowledge, attitudes and skills by teachers who are members of the Social Sciences Subject MGMP forum in Banjarnegara which was held on August 2018.*

*Service activities in the form of training in the formulation of techniques for evaluating student learning outcomes for social studies teachers for junior high schools throughout Banjarnegara, Central Java can work well. This activity is very useful in providing more in-depth knowledge and understanding of how to improve the quality of social studies learning. This activity is also an encouragement for social studies teachers to convey information especially to other teachers about the importance of the role of social studies teachers and in the development of student learning outcomes.*
