ABSTRACT

Efforts made by the Bojonegoro Regency Government to improve the quality of human resources of village officials and village activists in Bojonegoro Regency have been carried out through the Past Learning Recognition Scholarship Program (RPL) at the S1 level. In order to prepare RPL students to complete the final thesis project as a graduation requirement on time, intense assistance is needed in the preparation of the final thesis project. The solution to the problem offered in the lecturer program in village activities is assistance in writing research proposals. The purpose of this activity is among others to determine the analysis of needs in capacity building, the achievement of training and mentoring results, as well as supporting and inhibiting factors in the implementation of writing research proposals by Village Activists in Ngelo Village. Margomulyo District, Bojonegoro Regency
