

PELATIHAN PENERAPAN DESAIN PENELITIAN TINDAKAN DALAM BIMBINGAN DAN KONSELING

by Fathur Rahman, Sigit Sanyata, Agus Triyanto, Muhamad Nurwangid

ABSTRACT

The purpose of this community service activity is to improve the teacher's guidance and counseling ability in designing, implementing, and compiling classroom action research reports. The target audience for this activity is the BK Teachers with 22 guidance and counseling teachers. This training activity uses mentoring techniques. The measuring instrument used to determine the effectiveness of the technique is the training grading scale for preparing action class research proposals used during the pre-test and post-test. The results of the implementation of the activities showed that the training activities for developing classroom action research proposals through mentoring techniques for counseling guidance teachers showed improvement seen from the average pre-test score of 14.83 and the post-test average score of 27.17. Thus there was an increase of 12.34 points. Based on this, this service has succeeded in achieving its goals.
