

## **Development of Rhythmic Gymnastics Skills Test**

**by Ch Fajar Sriwahyuniati, Sri Mawarti, Nur Rohmah Muktiani**

### **ABSTRACT**

The purpose of this study was to develop a rhythmic gymnastics skill test. The research design used in this research is research and development using the Borg and Gall design. The instrument for collecting data in this development research was using a questionnaire, namely an open questionnaire and a closed questionnaire. An open questionnaire to find out suggestions from the sample given, and a closed questionnaire containing the statements chosen by the test subjects and material experts. The questionnaire or questionnaire aims to obtain data on the feasibility of the media in the form of numbers as a basis for revising products. This research was conducted in Yogyakarta. The results showed that the developed rhythmic gymnastics skills test was valid.
