

# ENHANCEMENT OF TEACHERS COMPETENCIES IN ENTREPRENEURSHIP THROUGH ONLINE LEARNING AND RECIPROCAL LEARNING ACTIVITIES

by Fitri Rahmawati, Kokom Komariah, Rizqie Auliana

## ABSTRACT

### Abstract

Learning from Home (BDR) during the Covid-19 pandemic was not easy to do just like that, especially for teachers who did not master technology. The implementation of learning at home certainly has several limitations, especially learning entrepreneurship crafts, which in normal conditions have many obstacles. As long as there is the Covid 19 pandemic, and the recovery afterwards, the role of teachers is very much needed, the community will really feel that teachers cannot be replaced by anything, including technology. The purpose of this activity is to improve the competence of teachers in entrepreneurship crafts, entrepreneurship work and creative entrepreneurial products during the Covid-19 pandemic.

This training activity was attended by 100 teachers of entrepreneurship crafts and creative entrepreneurial products in SMP, SMA and SMK. The method of activity was carried out online with three meetings through zoom meetings and intensive mentoring through e-mail communication and social media whatshap groups. Activities carried out with material exposure and discussion, assignments and intensive guidance, review and evaluation of the implementation of activities.

The results of the activities obtained are 1) Activities to increase the competence of craft teachers, entrepreneurship workshops and entrepreneurial creative products can be carried out through training activities. 2) Learning strategies for craft subjects, entrepreneurship craft and creative entrepreneurial products during the Covid-19 pandemic can be carried out using blended learning strategies and flipped learning methods. 3) Simplification of basic competencies can be done independently by paying attention to the essential basic competencies that must be mastered by students. 4) Distance learning implementation plans can be prepared for the smooth implementation of learning during the covid-19 pandemic.
