ABSTRACT

The purpose of this PPM is to strengthen the professional and pedagogic competency of elementary school mathematics teachers in Banguntapan District, Bantul Regency, in the implementation of Permendikbud No. 37 of 2018. This is motivated because as a component as well as an executor of the curriculum, teachers need to be prepared to implement the new Permendikbud. In conducting the training, the PPM team explained about how to strengthen the understanding of elementary school mathematical concepts and how to carry out innovative mathematics learning according to the Core Competencies and Basic Competencies contained in Permendikbud No. 37 of 2018. Then, the participants were given the task to compile the learning tools namely RPP, LKS, and questions by using innovative learning strategies oriented to students' mathematical concepts understanding. The success of this PPM activity was obtained through the observation sheet of the PPM activity implementation, the results of the PPM participant's workshop performance, as well as the comparison of PPM participants' pre-test and post-test scores.
