

Competence Improvement of Elderly Family Cadre (Bina Keluarga Lansia/BKL) through Training of Participatory Social Welfare Services for Elderly in Yogyakarta Province, Indonesia

by Nurul Khotimah, Kurnia Nur Fitriana, Poerwanti Hadi Pratiwi

ABSTRACT

This program focuses on improving the competency of BKL cadre who always interact directly with the elderly. This competency increase is carried out through participatory social welfare services training for elderly cadres. The target audience in this program is BKL Mugi Waras' cadre, Moyudan, Sleman, D.I. Yogyakarta. This program activity is conducted through training and focus group discussion (FGD).

The implementation program has been able to increase the competence of BKL Mugi Waras cadres through participatory social welfare training for the elderly. Supporting factors in this program are the moral will, ease of information accessibility, enthusiasm and positive response from participants and commitment from the team to complete this program with optimal results.

Meanwhile, the inhibitory factor from this program is technical aspects such as the timing of the implementation this program with participants, Limited mastery of technology from the trainees (officers and cadres BKL Mugi Waras), the understanding and responsiveness of trainees, and the time synchronization from the team. Nevertheless, every dynamics of the problems that arise so far is well-solved.
