ABSTRACT

This community service aims to provide training in learning media based on blended learning in the form of google classroom. The implementation of community service is divided into two, first discussion and training using the zoom on 12-13 September 2020, the second is guidance and mentoring using google classroom on 14-23 September 2020. This activity is expected to improve the skills of teachers, especially MGMP teachers. Yogyakarta Special Region Province office administration in managing blended learning-based learning media in the form of google classroom in the learning process and teaching other teachers. Community service activities use methods, namely, lectures (this method is used to convey explanations to participants about the material), discussion, (this method is used to explore problems and problems faced by participants related to the material), practice, and mentoring.

Based on the results of the evaluation of the implementation of community service activities, it was found that the level of participants' understanding of online learning media increased by 49 (44.20%) people and the level of understanding of participants in online learning google classroom increased by 34 (29.50%) people. The participation rate of participants was 277.5% (111) on the first day and 270% (108) on the second day of the initial target of 40. A total of 10 participants passed the google classroom class and were given certificates with training hours. The hope is that after participating in community service activities, the teachers can manage blended learning-based learning media in the form of google classroom in the learning process and teach other teachers.
