

# Scientific Writing Training for Students of SMA Angkasa Adisutjipto Yogyakarta

by Bambang Suprayitno, Tejo Nurseto, supriyanto

## ABSTRACT

Education is a long-term investment that can not be avoided despite the need for new benefits gained obtained in a few years later. Training is a form of education in the short term, one of which is the training of scientific writings. Training scientific work in SMA Angkasa Adisutjipto Yogyakarta needs to be done with the goal of increasing student interest in making scientific work in the form of research or study of thinking, make students able to determine the problem from the desired topic and method of writing is right in making scientific papers, and is able to optimize the beneficiaries internet in favor of making scientific work.

Solving the problem, it has been done by training and assistance in the form of material exposure, mentoring, and presentation of scientific papers. The material is presented namely identifying the issues, choosing the method used and others in making proposal. This training also describes how to use the internet to make writing and literature sources and extracting data. More than that will also be training on writing scientific papers report presentation.

In general, the implementation of PPM is already running with the indication of satisfaction and encouragement given in the implementation of the PPM. All participants made a scientific work, there are eight works that have been made during the training. Almost all the activities attended by participants there from the beginning to the end so that the classroom atmosphere is not quiet and be **more valuable** training. Many questions raised in the question and answer session, which was held so that more liven PPM.
