

# UPLOADING TEACHING MATERIALS DEVELOPMENT TRAINING PROBLEM BASED LEARNING FOR CLASS I, II, AND III PRIMARY EDUCATION TEACHERS

by Sri Hertanti Wulan, Suwarna, Nurhidayati, Yayan Rubiyanto

## ABSTRACT

*The training activity for developing uploaded teaching materials based on problem based learning (PBL) for grade 1, 2, 3 elementary school teachers aims to (1) train participants to be able to develop teaching materials that are complete and in line with the PBL-based implementation of Merdeka Belajar and (2) training participants develop interesting and innovative IT-based teaching materials.*

*The targets of this training are lower grade elementary school (SD) teachers, namely classes I, II and III in the Nogotirto Kapanewon Gamping cluster, Sleman Regency. Class teachers are the target of training activities because Javanese language subjects in the elementary school curriculum are taught by class teachers. Coordination of the implementation of this activity was carried out with one of the schools in the Nogotirto cluster, namely SD Nahdlatul Ulama Sleman as well as the place where the training activities were carried out.*

*Method: This activity is carried out online and offline using the blended learning method through lectures and practice which are arranged in a workshop activity with a predetermined output. After the training process is complete, the team will monitor and provide assistance to the training participants regarding the plans and outputs that have been determined. Evaluation of the success of the PkM program is based on program achievements and benchmarks for success. It will be successful if 80% of participants actively take part in the training and the teaching materials are fully uploaded.*
