

TRAINING OF SCIENTIFIC WRITINGS BASED ON CHARACTER EDUCATION

by Dr. Dyah Kumalasari; Zulkarnain, M.Pd; Rhoma Dwi AY

ABSTRACT

Today, Indonesia is experiencing a crisis of character, a declining sense of nationalism, began the erosion of a sense of nationhood, as well as a lack of respect for heroism. PPM activity aims to: (1) foster the spirit of writing among the students; (2) provide knowledge and experience to write scholarly works of history that can foster the spirit of nationalism and good character in students. PPM activity was conducted at SMAN 1 Pakem.

The method used in the PPM activities are as follows: (1) conduct trainings on material related to the introduction of scientific works of history, and give some examples of the results of scientific work of history-minded character education to students; (2) provide guidance to the participants conducting scientific writing of history. Mentoring activities meant for the students who have found the right theme, we can follow up by writing his notions into a scientific work history interesting and useful for character building of youth; (3) scientific works of history that are considered good and worthy, then included in the Scientific Writing Competition organized by HMPS in the same year.

Although encountered some resistance, but in general the PPM activities can be carried out well. Event runs approximately one and a half months, since the implementation of training activities on 13 September 2013 and was attended by 22 students, mostly belonging to the KIR group, extracurricular activities. The event begins with the first equip participants with materials about Grammar, talks about the subject matter of history and character education, historical research, which is then followed by guardianship until the participants can generate insightful history of the scientific work of character education. The target of this activity that is at least half of the number of participants can generate insightful history of the scientific work of character education has not been achieved to the maximum. There are only seven of scientific papers produced. Seventh is then included in the work of scientific writing competition organized by HMPS FIS UNY. Although the target of this activity has not been achieved to the maximum, but the results are quite encouraging, because of the seven works were included in the competition, one of which can be achievement Winner on scientific work competitions history.
