ABSTRACT

The implementation of the Dosen Berkegiatan di Luar Kampus (DLK) program titled Merdeka Curriculum-based Digital Teaching Media Development Training for MTsN 4 Sleman Teachers aims to provide an alternative use of learning media that suits the characteristics of junior high school students and to increase teacher competence in developing appropriate, creative and innovative learning media. The outputs of this activity are interactive learning media products in the form of an e- module created using the Canva app and social media publications. The methods for implementing this program are presentations, demonstrations and limited practice by the team during the training implementation. The enthusiasm of participants in the activities is one of the success criteria achieved and makes the DKL Team proud. This also illustrates that this activity was quite successful. It is hoped that the training output can become an alternative learning media based on the Merdeka curriculum in the school.
