ABSTRACT

This research reconstructs and revitalizes and creates an innovation from traditional play to foster jogja character in early childhood. This research aims to: (1) determine the effectiveness of traditional dolanan in cultivating jogja character values. (2) knowing the value of jogja character for early childhood. The approach to this research is research and development (R&D). The development of this development research uses the ADDIE (Analysis-Design-Develop-implementation-evaluate) model. The subjects in this research were early childhood children. Based on this research design, the analysis of product effectiveness data comes from pretest and posttest assessments to foster jogja character in early childhood. This research shows that: (1) N gain which shows the average value obtained from various character value items is 56%, which means it is quite effective; (2) Jogjaan character values, namely mutual cooperation, politeness, friendliness, empathy, honesty and helpfulness.
