

Training and Educational Assistance: Living Healthy with Social Media in Covid-19 Pandemic Conditions for Kindergarten Teacher

by Wuri Handayani, Suranto Aw, Novianto Yudha Laksana

ABSTRACT

This community service activity aims to provide training and mentoring as a provision for the skills to teachers who are members of the Gugus Sleman Tengah Kindergarten Teacher Conference in the use of social media.

The method of implementing the activities is carefully designed with the hope of becoming a representative pattern of problem solving. In this educational activity the implementation method is divided into four stages, namely: planning, implementing, evaluating, and program sustainability.

The results achieved from this service activity are: (1) The training material is highly relevant to the needs of the target audience and is acceptable, and its benefits can be felt. Based on the evaluation of activities, input is obtained so that service activities like this are carried out in a sustainable manner by raising other themes that are relevant to the needs of the audience and also in accordance with the expertise of service providers in the field of Communication Sciences.
