ABSTRACT

This Community Service Program aims to improve human resources, especially regarding Mocopat, Geguritan and Langen Carito in the community of Giripurwo, Purwosari, Gunungkidul, Yogyakarta. The PPM method and model uses a structured workshop and practical training model with the target of this PPM activity being 30-50 local people. This PPM activity is carried out in the form of training, workshops and structured practice using the lecture method, question and answer, demonstration and hands-on practice. The results of this training were 1, the enthusiasm of the residents in participating in the mocopat, geguritan and langencarito training, 2. Actively participate in activities and want to give questions and statements for the development of the community, especially in the arts of mocopat, gegeritan, langen carita.
