

Mapping of Student Research at Indonesian Literature Study Program

by Prof. Dr. Suhardi, Dr. Teguh Setiawan, Joko Santoso, M.Hum.

ABSTRACT

ABSTRACT

This qualitative study aims to describe (1) types of researches of student at Indonesian Literature Study Program; (2) subject research of student at Indonesian Literature Study Program; and (3) pattern of research titles of student at Indonesian Literature Study Program .

The data source was research project that call *Skripsi* by student in Indonesian Literature Study Program in three years, i.e 2013, 2014, and 2015. The data were collected by reading the data corpus thoroughly and recording them in data cards. The instrument is human instrument. To select precise and accurate data, an instrument in the form of parameters to determine subject matter and types of research was used. The data were analyzed using the description qualitative.

Based on the data analysis, three conclusions can be drawn. First, types of research are qualitative research. Second, research field for linguistics program are pragmatic, sociolinguistics that focus to speech act, politeness principle, switching and mixing codes, and register, while research field for literature programs are novel and short story that focus to many perspective. Third, pattern of research titles of student at Indonesian Literature Study Program by focus two variable: object variable and subject variable. That is concord with types of research, i.e qualitative research.

Kata Kunci: *research*
