Abstract

The purpose of community service program (PPM) was to provide motivation for teachers at SDN Cepit, Pendowoharjo, Sewon, Bantul to be more active in writing scientific papers either for the purpose of promotion or for development and the demands of professionalism of teachers. It also gave them skills in an effort to improve the ability to write scientific papers. This program was also to provide motivation and skills to the teachers at SDN Cepit in an effort to publish the results of their writing.

This program include lecturing method, which is a conventional method that is often used by trainers to provide training to the participants. This method emphasized on one-way communication. The benefit of this way was time saving; trainers could control the topic in accordance with the curriculum being run. The next method was discussion. The last method was having a workshop for the preparing a book draft. In this method, teachers were required to prepare and draft a teaching material in accordance with the subject of teaching. They have the opportunity to practice how to prepare and develop the teaching materials appropriate to the grade levels and curriculum that is being run by teachers. This event was attended by 16 teachers and 2 students.

Participants have a high enthusiasm for social activities, was demonstrated by their participation that followed from the beginning until the finish during activities of the program.

The result of this community service program showed that participants wanted the follow-up activities to enable them to be more professional and increase their competence to support teaching and learning in schools. The university party did not hesitate to sharing and caring in capacity building program in trElementery School for the sake of the ideal of national education goals achieved.
