

# **As PowerPoint Interactive Development Training For Teachers Learning Media IPS MGMPs Gunung Kidul**

**by Saliman, Sudrajat, Agus Sudarsono**

## **ABSTRACT**

Teaching History in Junior High School (SMP), generally considered boring and overlooked by most students. History is considered unattractive because it only contains the years, a series of events and happenings, characters, dry facts. Most of the teachers who teach the lessons of history are still monotonous, does not give examples of factual, and do not use media that can increase students' motivation and interest in these subjects. Therefore, training of media making power point is expected to encourage history teachers in Bantul can create and develop media power point and use them in the learning process so expect the historical learning activities become more interesting and meaningful.

Service activities carried out by the lecture and question and answer, demonstration, training and tutorials as well as the practice of making the media. Training and tutorials held on October 23, 2014 in the Junior 1 Gunung Kidul, Yogyakarta.

In general, teachers are enthusiastic about taking this service activities as indicated by keaktifan them in training and tutorials.

They also follow up with the practice of making independent media and consult with a team of stewards in assisting the development of the media. They consider this activity is crucial to increase their competence as teachers must design and implement pedagogical activities. Making media is one of a series of activities that membantu improve their skills and competence. This activity is expected no follow-up so that the future teachers in Gunung Kidul IPS can also create other social studies instructional media.
