

Implementation of Safety Education socialization in the lower classes

by yustinus sukarmin, margono, sudardiyono

ABSTRACT

Students of the Faculty of Sport Sciences are students who are not familiar with a wide range of motion. Students who deliberately masuk at the Faculty of Sport Sciences since before it registered as a student should have been preparing to perform a variety of physical activities in order during the lectures had no trouble in a wide range of motion. Students' FIK UNY from SM 1 to SM 3 is closely related to the lecture on the ground. Lecture basic motion much given at the beginning of the semester for students who had just entered college after a secondary education, state-owned is still classified as in need of development optimally, so that with the number of lectures practice field that requires a lot of energy for beginning students is not an obstacle but it is a pleasure. Debriefing basic skills course is mandatory for students, as a package or requirements to achieve a bachelor's degree of physical education. For students PGSD FIK UNY, all lectures in all places, the practice is strongly supported by facilities and infrastructure memadai. Facilities and infrastructure for the practice of all branches of study, for students PGSD FIK UNY supplied from the institution was more than enough, ranging from the swimming pool, athletics track, playing fields, GOR, unless it is found necessary exercise their infrastructure more memadai. Memadahi facilities and infrastructure that greatly affects the condition of the student in achieving the learning objectives is to achieve mastery of basic skills expected. Basic skills achieved FIK UNY students should be coupled with optimal motor skills, given the range of basic motion is granted, and do all of the students
