ABSTRACT

STUDENT PROFILE AND MAPPING STUDY PROGRAM S-2
IN POSTGRADUATE PROGRAM OF YOGYAKARTA STATE UNIVERSITY

Abstract

This descriptive study aimed to describe the profile of students who take the test at the postgraduate and describe the profile of students of S-2 PPs seen from the academic aspect.

Source of this research is new student registration documents and documents graduated. Registration documents to see calaon student profile data, whereas yudisum document used to see the student's academic pril. Data were collected through the technique of reading log. Instruments used are human instrument, while the data analysis method used is descriptive statistics.

The results of this study showed two things. First, prospective students pasacasajana student profiles are very diverse. They do not come from a variety of regions and universities, both public and private universities. Second, the academic profile of students has increased. It can be seen from the increase in value and decrease time academic study.
