

Analysis of disaster resilience community development strategy level on regional resilience in Thailand and Indonesia

by Taat Wulandari, Satriyo Wibowo, Agustina Tri Wijayanti

ABSTRACT

Resilient are closely related to adaptation, mitigation, and adjustment responses to reduce disaster risks, both through physical development and awareness and increase capacity to deal the disaster threats and responses, which are parts of regional resilience as a form of the city's ability to respond based on the threats it faces.

Kata Kunci: *Disaster, Disaster mitigations, and resilience*
