

## TRAINING OF SCIENTIFIC WRITING FOR GRADUATES OF GEOGRAPHY EDUCATION

by Suhadi Purwantara, Muhammad Nursa'ban, Arif Ashari, Bagas Syarifudin, Dinda Swastika Nugraha

### ABSTRACT

This community service is motivated by the importance of refreshing and increasing the ability of writing scientific papers for graduates of Geography Education. Writing scientific papers is an integral part of education at various levels. Graduates of Geography Education who have the main authority as geography educators need to develop the ability in writing scientific papers. This community service is carried out with the objectives of: (1) Increasing the understanding of graduates of Geography Education through refreshing scientific work writing materials, (2) Increasing the ability of graduates of Geography Education to implement scientific writing and publish through various scientific publications. The target participant of this program are graduates of Geography Education from various provinces in Indonesia. This activity is carried out in an online workshop format with a duration of 30 hours. The training activities were held in five days between November 15 to 19, 2021. The results obtained from this activity were as follows: (1) refreshment and improvement in understanding of scientific writing was obtained through the delivery of material on the selection of geography topics, utilization of data and library sources, coaching clinic preparation of scientific paper manuscripts, accompanied by activities that support the achievement of abilities in these three aspects. (2) improving the ability to publish scientific papers is achieved through the delivery of material regarding the publication of scientific papers to international conferences, publication of scientific papers to journals, supported by the practice of identifying publications of manuscripts in proceedings and journals. In general, the main achievement of this training activity is that graduates of Geography Education get refreshment, improvement, and renewal, various knowledge and skills in writing scientific papers. Furthermore, this activity is expected to encourage the graduates of Geography Education to improve their performance, especially during this COVID-19 pandemic.
