## ABSTRACT

The specific objectives to be achieved through community service activities is to help teachers especially junior high science teachers in the city of Yogyakarta in designing, developing, and implementing both the process and system of assessment of science learning outcomes , especially the use of performance-based instruments. The target audience of community service activities are 90 people junior high school science teachers in the city of Yogyakarta who gathered in science MGMPs . The approach refers to the process of empowerment of human resources is done through training / workshops, coaching, and mentoring for participants. Based on the results of direct observation and analysis of the results of the task of each participant, it can be concluded that the provision of counseling, training, and mentoring for participants in designing, developing, and implementing performance-based assessment instruments work well.
