

## Testen und Prüfen im DaF-Unterricht

by Drs. Sudarmaji, M.Pd. Dkk.

### ABSTRACT

In the evaluation of learning is one of the important components and processes that must be taken by the teacher to determine the effectiveness of learning. The results obtained from the evaluation of the actions can be reversed (feed back) for teachers in improving and refining the programs and learning activities hereinafter. Besides the evaluation is also useful to help learners, identify strengths and weaknesses of learners, assess and improve the effectiveness of learning, assess and improve the effectiveness of the curriculum program, and also provide data to help in making decisions. However, this learning component that is often less attention from teachers, especially in terms of providing good and quality matter.
