ABSTRACT

The history of the hamlet is an interesting thing to explore to benefit the village in economic and cultural development. Gupolo is one of the hamlets in Cucukan Village, Prambanan, Klaten. This region holds cultural potential that is not yet known to the wider community. To assist the village in exploring the history of Gupolo Hamlet, the method used is oral history. One historical research method uses interview techniques. Cucukan Village is developing culture and excavating the history of the hamlet in collaboration with two UNY History Science PPM Teams who want to explore the history of the existing hamlet. Two PPM teams will provide training and assistance in exploring the oral history of Gupolo and Kedung hamlets. It is hoped that the training and mentoring will result in a Cooperation Agreement Letter, a book on the History of Gupolo and Kedung Hamlets, and publications on social media regarding this PPM activity.
