ABSTRACT

In assessing the mastery of techniques in the game of volleyball, of course, it requires a good, valid and reliable instrument. So far, there are no instruments that are used specifically to assess the skills of novice athletes. Therefore, the thought arose of creating an instrument to assess the development of mastery of the technique for novice athletes. The purpose of this study was to produce an assessment instrument of the basic techniques of volleyball for Novice Athletes. This research method is Reserch &Development (R&D). The results of small-scale trials showed that the percentage of the average score of the coach's assessment of the skill assessment instrument for novice athletes was 87.5%. Large-scale trials showed that the percentage of the average score of the coach's assessment of the skills assessment instrument for novice athletes was 85.42%.
