

Capacity Building and Teacher's Career through the Establishment of Classroom Action Research (CAR) on SMAN 8 Purworejo

by Grendi Hendrastomo, Poerwanti Hadi Pratiwi, V. Indah Sri Pinasti

ABSTRACT

The aims of this community service activities to trained teachers doing Classroom Action Research (CAR). The learning outcomes expected later teachers can create articles that ultimately can be used to enhance the careers of teachers. The methods used in the implementation of these activities consist of training, workshops and mentoring. Some of the factors supporting these activities, among others, cooperation and good coordination, as well as the active role of the participants, support the school and enthusiasm from participants.

The community service activities conducted through a series of activities ranging from discussion to explore the knowledge of participants associated with a Classroom Action Research (CAR), discussions about the problems that are often encountered, creation of CAR scheme to be implemented on the basis of observation and characteristics of learners, making a proposal to mentoring in the manufacture of CAR proposal. The result of the activities was the teachers on SMAN 8 Purworejo design CAR proposals. CAR proposals that had already been produced will be continued with the implementation of the next semester.
