### ABSTRACT

The quality of learning in the world of education needs special attention. In addition to achieving KKM values ??in learning that makes students have multiple intelligent. The world of education increasingly challenges that must be solved by education actors, especially educators. Educators or teachers need to carry out various learning innovations carried out in the classroom so that the achievements of students are getting better from cognitive, affective and psychomotor aspects.

The Dedication method used includes: lectures, workshops, and assignments. The design was determined by assessing the assignment of students with a score range of 0-100 and providing a PPM customer satisfaction questionnaire with 40 items and a range of scores 1-4.

Dedication program activities are carried out by providing material about Best Practice; Making the School Superior with lecture methods, workshops and assignments. The next material is the use of an android-based application for social studies learning media, on this occasion filled with the MIT App Inventor Application and Lectora Final test. Based on the results of the Best Practice manuscript assessment made by all PPM participants the result is 25% very good category with a value above 85, 60% categorized well with a value between 70 to 85 while 15% categorized enough with a score below 70. Based on the participant satisfaction questionnaire The PPM distributed by the Servant Team as a form of evaluation of PPM activities obtained 64% in the high category, 30% in the high enough category and 6% in the low category. Then it can be concluded that PPM participants have high satisfaction with the workshop activities from the service team.
